## Bancolumbia swift code

Apple will release the source code underlying its Swift programming language, a move that could broaden the user base for the new language.

When Swift becomes open source later this year, programmers will be able to compile Swift programs to run on Linux as well as on OS X and iOS, said Craig Federighi, Apple's head of software engineering, during the opening keynote of Apple's Worldwide Developers Conference Monday in San Francisco. The source code will include the Swift compiler and standard library, and community contributions will be "accepted—and encouraged," Apple said. Introduced at last year's WWDC, Swift was developed by Apple as a potential replacement for the Objective C language that most developers have used to write applications for the Mac and iOS devices. Based on the C programming language, Objective C can be cumbersome and lacks many of the features of more modern programming languages. Unlike a lot of tech companies, including Facebook and Google, Apple hasn't released much of its own software as open source in the past. "The thinking at Apple is beginning to change," said IDC analyst Al Hilwa. The company realizes that "open source, and a strategy that will send Swift to other platforms, is a path to better adoption." "Open source has a lot of benefits for vendors," he said via email. It can provide greater visibility for a product and generate good will in the development community. Microsoft, for one, has benefitted by open sourcing several pieces of infrastructure, including key parts of its .Net framework. Apple wants Swift to find a home beyond Apple. Being open source could potentially allow the language to be ported to other platforms, such as Windows. Another potential benefactor might be Google's Android OS, given that it's based on Linux—though Android's supporting libraries are different than those in the standard Linux kernel supported by Swift. Even confined to Apple products, Swift appears to have done well in the year since its release. It's now in the top 20 of the world's most widely used languages, according to the TioBE Index, a monthly survey comparing the popularity of programming languages. Apple also announced that it is preparing to release version 2 of Swift, which will feature improved error handling, additional protocol extensions and modular optimization. Copyright © 2015 IDG Communications, Inc. Bancolumbia S-A is a banks-regional business based in the US. Bancolumbia S-A shares (CIB) are listed on the NYSE and all prices are listed in US Dollars. Bancolumbia S-A employs 30,628 staff and has a market cap (total outstanding shares value) of 0.00. Compare share trading platforms. Use our comparison table to help you find a platform that fits you. Open your brokerage account. Complete an application with your details. Confirm your payment details. Fund your account. Research the stock. Find the stock by name or ticker symbol — CIB — and research it before deciding if it's a good investment for you. Purchase now or later. Buy your desired number of shares with a market order or use a limit order to delay your purchase until the stock reaches a desired price. Check in on your investment. Optimize your portfolio by tracking your stock. We evaluate stock trading platforms against a range of metrics that include fees, ease of use, available securities and advanced tools to meet specific investor needs. We encourage you to compare stock platforms to find one that's best for your particular budget and goals. Our pick for beginners. We chose Robinhood for this category because it offers commission-free trading and is easy to use. You can search for stocks by company name, and the mobile app is clean and intuitive to use. Our pick for active traders. We picked Interactive Brokers for this category because it offers advanced tools and low fees for active investors and pros. The simpler IBKR Lite platform is aimed at less-active investors, but all users older than 21 must meet a \$20,000 liquid net worth requirement for a cash account. Our pick for building a portfolio. We picked Webull for this category because its platform offers features that cater to beginners but will satisfy active investors. The desktop app is outfitted with helpful tools, the mobile app gets high grades from users, and investors can test strategies with a paper-trading feature. Historical closes compared with the close of \$29.3 from 2021-05-26 1 week (2021-05-21) -0.61% 1 month (2021-04-29) -5.02% 3 months (2021-03-01) -14.73% 6 months (2020-11-27) -4.84% 1 year (2020-05-29) 13.30% 2 years (2019-05-29) -36.99% 3 years (2018-05-29) 46.29 5 years (2016-05-27) 33.19 Is Bancolumbia S-A under- or over-valued? Valuing Bancolumbia S-A stock is incredibly difficult, and any metric has to be viewed as part of a bigger picture of Bancolumbia S-A's overall performance. However, analysts commonly use some key metrics to help gauge the value of a stock. Bancolumbia S-A's PEG ratio Bancolumbia S-A's "price/earnings-to-growth ratio" can be calculated by dividing its P/E ratio by its growth — to give 1.65. A low ratio can be interpreted as meaning the shares offer better value, while a higher ratio can be interpreted as meaning the shares offer worse value. The PEG ratio provides a broader view than just the P/E ratio, as it gives more insight into Bancolumbia S-A's future profitability. By accounting for growth, it could also help you if you're comparing the share prices of multiple high-growth companies. Gross profit TTM \$7,689.7 billion Return on assets TTM 0.19% Return on equity TTM 1.76% Profit margin 5.72% Book value \$36.52 Market capitalisation \$7 billion TTM: trailing 12 months Shorting Bancolumbia S-A shares There are currently 1.1 million Bancolumbia S-A shares held short by investors — that's known as Bancolumbia S-A's "short interest". This figure is 0.9% down from 1.1 million last month. There are a few different ways that this level of interest in shorting Bancolumbia S-A shares can be evaluated. Bancolumbia S-A's "short interest ratio" (SIR) Bancolumbia S-A's "short interest ratio" (SIR) is the quantity of Bancolumbia S-A shares currently shorted divided by the average quantity of Bancolumbia S-A shares traded daily (recently around 261713.33333333). Bancolumbia S-A's SIR currently stands at 4.2. In other words for every 100,000 Bancolumbia S-A shares traded daily on the market, roughly 4200 shares are currently held short. However Bancolumbia S-A's short interest can also be evaluated against the total number of Bancolumbia S-A shares, or, against the total number of tradable Bancolumbia S-A shares (the shares that aren't held by "insiders" or major long-term shareholders — also known as the "float"). In this case Bancolumbia S-A's short interest could be expressed as 0% of the outstanding shares (for every 100,000 Bancolumbia S-A shares in existence, roughly 0 shares are currently held short) or 0% of the tradable shares (for every 100,000 tradable Bancolumbia S-A shares, roughly 0 shares are currently held short). Such a low SIR usually points to an optimistic outlook for the share price, with fewer people currently willing to bet against Bancolumbia S-A. Find out more about how you can short Bancolumbia S-A stock. %Dividend payout ratio: 1.98% of net profits Recently Bancolumbia S-A has paid out, on average, around 1.98% of net profits as dividends. That has enabled analysts to estimate a "forward annual dividend yield" of 3.15% of the current stock value. This means that over a year, based on recent payouts (which are sadly no guarantee of future payouts), Bancolumbia S-A shareholders could enjoy a 3.15% return on their shares, in the form of dividend payments. In Bancolumbia S-A's case, that would currently equate to about \$0.92 per share. While Bancolumbia S-A's payout ratio might seem low, this can signify that Bancolumbia S-A is investing more in its future growth. Bancolumbia S-A's most recent dividend payout was on 14 April 2021. The latest dividend was paid out to all shareholders who bought their shares by 31 March 2021 (the "ex-dividend date"). Bancolumbia S-A share price volatility Over the last 12 months, Bancolumbia S-A's shares have ranged in value from as little as \$24.125 up to \$41.5862. A popular way to gauge a stock's volatility is its "beta". CIB.US volatility(beta: 1.12)Avg. volatility(beta: 1.00)LowHighBeta is a measure of a share's volatility in relation to the market. The market (NYSE average) beta is 1, while Bancolumbia S-A's is 1.121. This would suggest that Bancolumbia S-A's shares are a little bit more volatile than the average for this exchange and represent, relatively-speaking, a slightly higher risk (but potentially also market-beating returns). Bancolumbia S-A overview Bancolumbia S. A. provides various banking products and services to individual and corporate customers in Colombia, Panama, Puerto Rico, El Salvador, Costa Rica, and Guatemala. The company operates through nine segments: Banking Colombia, Banking Panama, Banking El Salvador, Banking Guatemala, Trust, Investment Banking, Brokerage, International Banking, and All Other. It offers checking and savings accounts, fixed term deposits, and investment products; trade financing, loans funded by domestic development banks, working capital loans, credit cards, personal and vehicle loans, payroll loans, and overdrafts; financial support to real estate developers and mortgages for individuals and companies; and financial and operating leasing services.
